Subject: Slap on the hand!

Microsoft should not be let off easily because

1. They violated business ethics repeatedly with their unfair practices.
2. Their just dessert should be the break up of the company into separate divisions.
3. Giving free software will not do as it only helps them get more clients rather than disciplining them.
4. Microsoft is all about control and no one can control them unless the US govt steps in and does it.
